Sycamore

Autumn Term

Your 'Must Do' Science Task

Science — Electricity

As part our current learning in science is focusing on electricity could you:

- Invent and design your own electrical appliance or object

Ideas

You could:

- Design a new appliance that runs on electricity to use at home or in school
- Invent a new appliance or piece of technology that can enhance our daily lives
 - Design a new form of electrical vehicle or mode of transport

You can present your work however you like but you **MUST** explain how it works using electricity.

Your Choice Tasks

Autumn Term Choice 1:

Focus: Design and Technology

Can you research, plan, create and evaluate an Autumn inspired dish?

Can you make a nutritious dish and explain your choices ?

You could even use seasonal ingredients from this time of the year!

Make sure to take photos of your work or even do a short video explaining what you have done.

Autumn Term Choice 2:

Focus: History

Research and gather information about the history of Malpas during war time.

Can you discover what life was like for children during such time?

What did Malpas look like back then?

You can present your work however you like. This could be as a powerpoint presentation, a video or an informative leaflet.
