

## Creative Choice Homework

Spring Term  
BEECH

### Your 'Must Do' Science Task

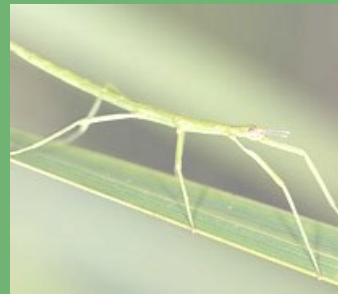

This term we have had some new arrivals in Sycamore class...stick insects!

As a class, we have discussed the important of providing them with the best care and conditions that we can to make sure that their stay with us is a happy one!

#### Your task

Research stick insects and produce information on these key areas:

- Their habitat (How can we create the best habitat for them to live in?)
- What do they eat? (What food do they need to survive, where will we find it?)
- How do we care for them each day? (What jobs will we need to carry out daily/weekly to look after them?)

You can present your work how you like such as in a presentation, a video or a leaflet!

#### Choice 1—Art

##### Monotype and Prints

##### Research and Create

This half term we are looking at 'monotypes' and how they are used within the art of famous artists.

Can you conduct some of your own research of monotypes in art and have a go at creating some of your own work on the theme of 'Spring'.

#### Choice 2— Reading

Take a look at one of the books that you love or are currently reading.

Choose something from it to create and make at home.

This could be a meal that is eaten by one of the characters (Maybe the chocolate cake eaten by Bruce Bogtrotter in Matilda) or a model of an item from the story (perhaps you could make your own version of the golden snitch from the Harry Potter) books..

It is entirely up to you what you sketch, or make!

Remember to take photos and share with us in school!
